EDUCATION

SBPCOE, Pune University — Pune, Maharashtra, India
Bachelor Of Engineering — *2017-2020*

EXPERIENCES

Cognizant Technology Solutions India pvt ltd — Programmer Analyst Feb 2022- May 2024
Pune, Maharashtra, India

- Developed reusable web components using React JS, enhancing code efficiency and maintainability through functional programming and custom hooks.
- Gathered and defined customer requirements to develop clear specifications for project plans, ensuring alignment with business needs.
- Worked on client-side applications with React and JavaScript, and held knowledge in server-side development with Node.js, focusing on REST APIs and common interceptors for seamless functionality.
- Utilized Redux for global state management, proficiently working with middleware's like Redux-Saga and Redux-Thunk for effective asynchronous actions.
- Collaborated with distributed teams, including business analysts and product owners, in an Agile environment to ensure efficient project development and iteration. Employed modern JavaScript ES6 features, React hooks, and libraries such as Formik for form handling.
- Conducted code reviews, implemented testing with Jest, and maintained focus on performance optimization and security best practices.

Testyantra Global — Internship March 2021- Jan 2022
Bangalore, Karnataka, India

- Contributed to the development of a scalable web application using Core Java, Spring, and SQL, honing skills in backend development and database management.
- Designed and implemented intuitive user interfaces using JavaScript, CSS, and HTML, ensuring seamless integration with the backend and delivering a rich user experience.

PROJECTS

NetflixGPT | *React.JS, JavaScript, Redux, OpenAI API, Firebase* link

- Developed NetflixGPT, featuring user authentication, form validation, and profile updates with React, Redux, and Firebase.
- Integrated TMDB API for movie data and trailer videos, styled with Tailwind CSS, and implemented custom hooks for fetching and displaying content.
- Utilized Open-Ai's GPT for multi-language search and movie suggestions, enhancing user experience with dynamic recommendations.

ACHIEVEMENT

Hats Off Award

- Manager award for meeting the client deadlines on timely delivery.

React Developer Certification[HackerRank]

- Passed coding assessment in React, JavaScript, CSS, and HTML.

TECHNICAL SKILLS

Languages:: JavaScript, Typescript, Core Java
Frameworks:: React, Material Ui, Bootstrap, Junit
Libraries:: Redux, React router, Context api, Enzyme
Stylesheet Languages:: Css, Scss, Talwind Css, Css3
Markup Language:: Html, Html5
Developer Tool:: Visual Studio Code, Git , Bitbucket, Confluence
